Quick and Handy Grammar Review

THE FUTURE PROGRESSIVE

A. Function 1

The main function of the future progressive (also called *the future continuous*) is to show a continuing (long) action getting interrupted by a short future action.

Tense	Future Progressive (Main Use)
Diagram	
Examples	<ul style="list-style-type: none"> • I will be eating dinner when he calls me tomorrow night. • When he calls me tomorrow night, I will be eating dinner.
Form	will + be + -ing verb
Function	Two actions will occur in the future. The first (long) action is interrupted by the second (short) action.
Time Marker	when

NOTES

- When forming the future progressive in English, the independent clause uses **will + be + -ing verb** and the dependent clause takes the **simple present**. Even though the verb in the dependent clause has a simple present structure, both clauses have a future meaning. Remember that the dependent clause can come before or after the independent clause. When it comes before the independent clause, a comma is needed.
 - **We will be playing soccer** when the storm hits.
 - When the storm hits, **we will be playing soccer**.
- Some verbs are common as short actions, and knowing them will help you identify if a sentence needs the future progressive. These verbs include *call, ring, arrive, come, land, hit, and go out*.
 - They will be studying when the bell **rings**.
 - She will be sleeping when his plane **lands** tonight.

A. Function 1 cont.

NOTES CONT.

3. The short action in a future progressive sentence can be expressed simply by a time reference instead of a full clause. If a time reference comes before the independent clause, the comma is optional because time references are very short.
 - Mr. Ferguson will be collecting the tests **at 3:00 pm**.
 - They will still be arguing **at noon tomorrow**.
 - **At Christmastime** many people will be shopping for gifts.
 - **At 11:00 pm tonight**, I will still be playing the guitar.
4. *Will* is often contracted to *'ll* in speaking and informal writing.
 - You'**ll be doing** the dishes when I get home from work.
 - When I get home from work, you'**ll be doing** the dishes.
5. It is possible to use *be going to + be + -ing verb* to form the future progressive. Because it is such a long verb tense, *will + be + -ing verb* is more common. Note that though we can use the *present progressive* to indicate a simple future tense, we can never use it with the future progressive.
 - ✗ She **is being studying** when I call her.
 - ✓ She **is going to be studying** when I call her.
 - ✓ She **will be studying** when I call her. (*the most common form*)

B. Function 2

The secondary function of the future progressive is to emphasize that two long, continuing actions will happen at the same time.

Tense	Future Progressive (Secondary Use)
Diagram	
Examples	<ul style="list-style-type: none"> • I will be answering emails and you will be texting your friend. • You'll be texting your friend, and I'll be answering emails.
Form	will + be + -ing verb
Function	Two long actions will occur at the same time in the future.
Time Markers	The adverb "while" is possible, but the conjunction "and" is more common.

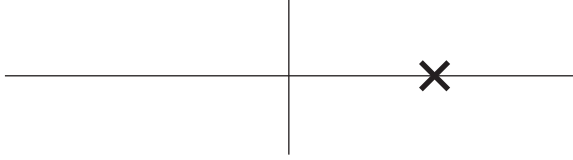

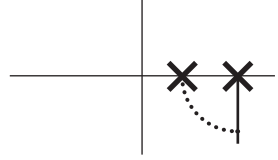

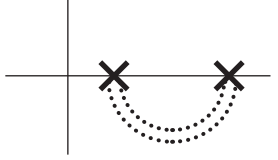

NOTES

- It is also possible to use the future progressive to emphasize only one long future action.
 - We **will be studying** all night.
 - The audience **will be begging** for more.
- Remember that non-action verbs (*be, have, feelings, states, the five senses, etc.*) almost never take a progressive form.
 - ✗ She will be having a new puppy next month.
 - ✓ She **will have** a new puppy next month.
 - ✗ They will be liking the performance tonight.
 - ✓ They **will like** the performance tonight.
- The future progressive can also be used to ask politely about someone's intentions.
 - **Will he be bringing** his girlfriend to the party tonight?
 - **Will you be coming** home right after work?
- Note that though two future progressive verbs are possible, it is more common to use two simple future verbs unless you really want to emphasize the long action.
 - ✓ I **will be answering** emails and you **will be texting** your friend.
 - ✓ I **will answer** emails and you **will text** your friend. (*more common*)

C. The Simple Future Vs. The Future Progressive

The simple future is used to show a future action.
Compare the two tenses using the diagram below:

Tense	Simple Future	Future Progressive	
Diagram			
Form	<ol style="list-style-type: none"> will + base verb be going to + base verb be + -ing verb 	will + be + -ing verb	
Function	Used to show a future action.	A long future action will be interrupted by a short future action.	Two long actions will occur at the same time in the future.
Time Markers	<ul style="list-style-type: none"> tomorrow the day after tomorrow next from now when 	<ul style="list-style-type: none"> when 	<ul style="list-style-type: none"> and while
Example	<ol style="list-style-type: none"> I will call you tomorrow night. I am going to call you tomorrow night. I'm calling you tomorrow night. 	I will be sleeping when the girls get home.	I will be studying and you will be watching TV.

Exercise 1

Form the future progressive of the verbs in brackets.

1. The sun will be shining when the kids wake up tomorrow morning.
(shine)
